

## Experiment 10: Tic Tac Toe Game

### Aim

To develop a Tic Tac Toe game using Python.

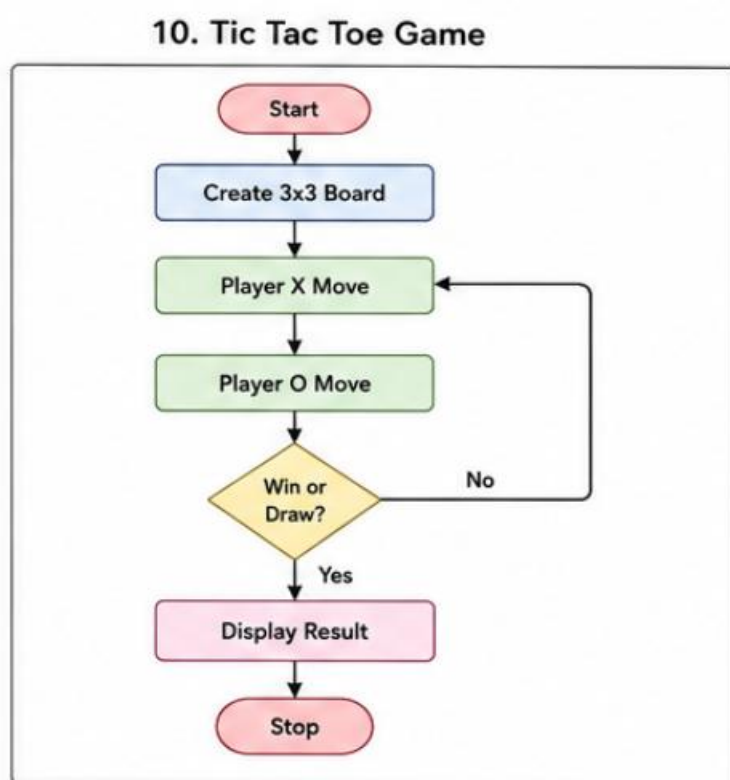

### Objective

To allow two players to play Tic Tac Toe.

### Algorithm

1. Create the game board.
2. Accept player input.
3. Update the board.
4. Check for a winner.
5. Display the result.

### Flowchart

### Code

```
board = ["X","O","X",
```

```
"O","X","O",
```

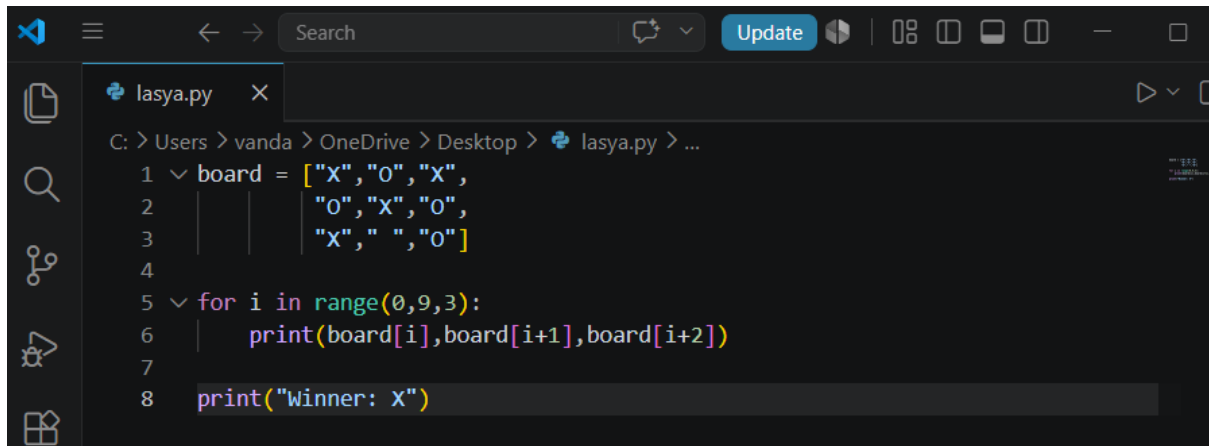

```
"X"," ","O"]
```

```
for i in range(0,9,3):
```

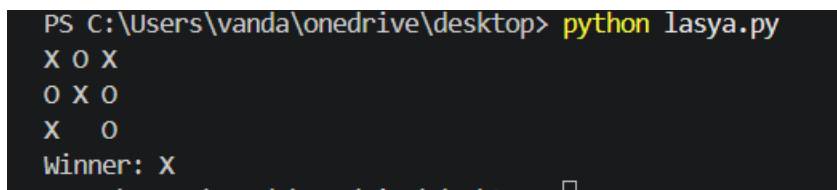

```
    print(board[i],board[i+1],board[i+2])
```

```
print("Winner: X")
```

**Output :**

A screenshot of a code editor window with a dark theme. The file name is 'lasya.py'. The code is as follows:

```
C: > Users > vanda > OneDrive > Desktop > lasya.py > ...
1  board = ["X","O","X",
2          "O","X","O",
3          "X"," ","O"]
4
5  for i in range(0,9,3):
6      print(board[i],board[i+1],board[i+2])
7
8  print("Winner: X")
```

A screenshot of a terminal window with a dark background. The command 'python lasya.py' has been executed, resulting in the following output:

```
PS C:\Users\vanda\onedrive\desktop> python lasya.py
X O X
O X O
X  O
Winner: X
```

## Result

The Tic Tac Toe game executed successfully.

## Conclusion

The game correctly displays the board and identifies the winner.
